

# Evolution as a Cycle of Multi-level Processes

## ■ Introduction:

## ■ Question/Conclusion

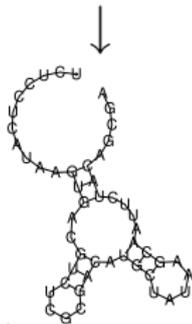

- Evolution of Information & Organization
- Evolution of Complexity

# Spatial RNA Replicator System

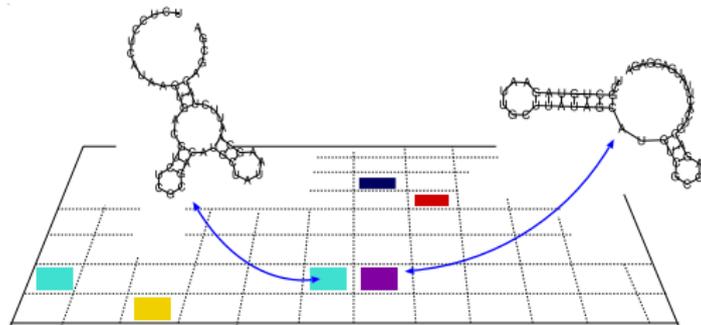

Genotype  $\rightarrow$  Phenotype

(E.g.)

UCUCCUCAU  $\sim$  CUACAGCGA

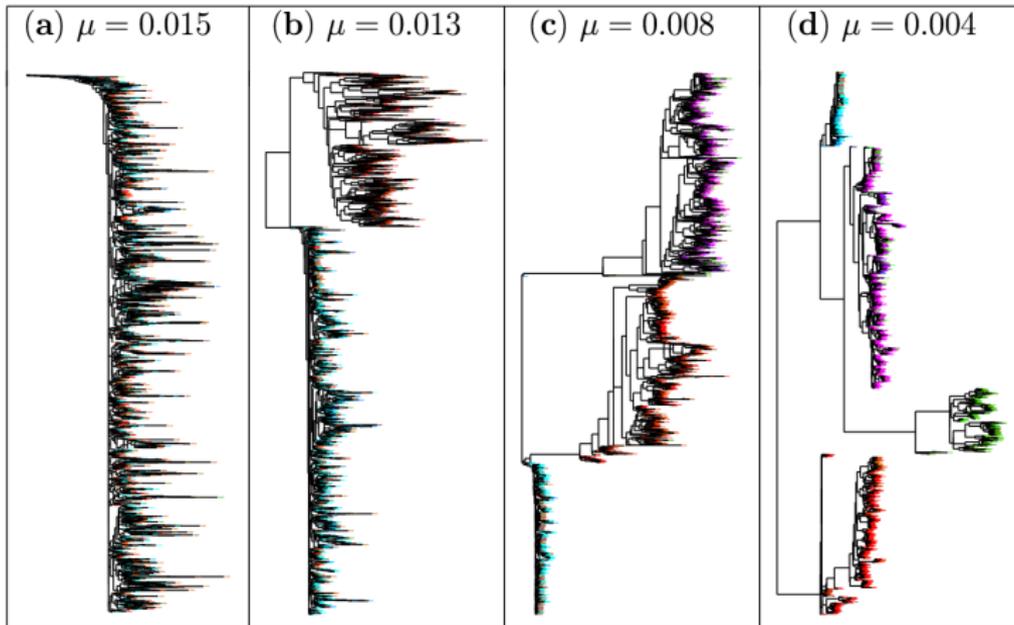

Phenotype  $\rightarrow$  Interactions

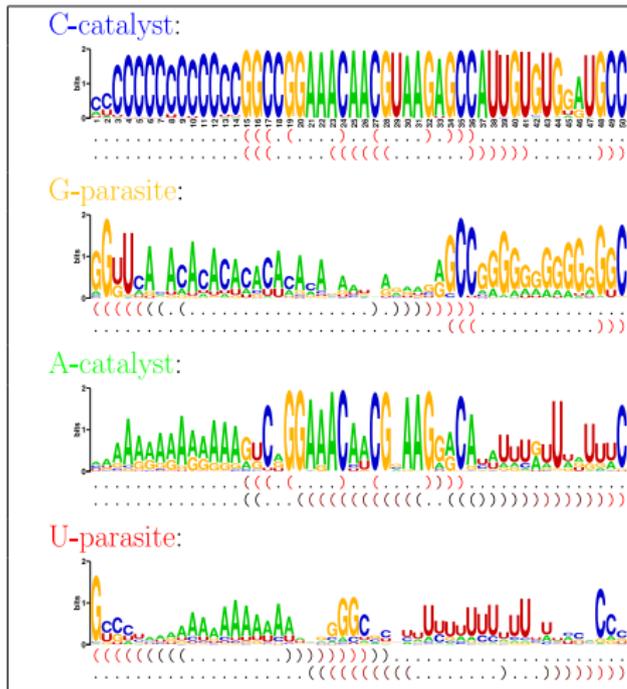

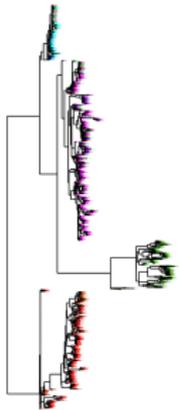

- Complex: 5'-end  $\rightarrow$  3'-end
- Replication: if phenotype correct

# Evolution of Populations

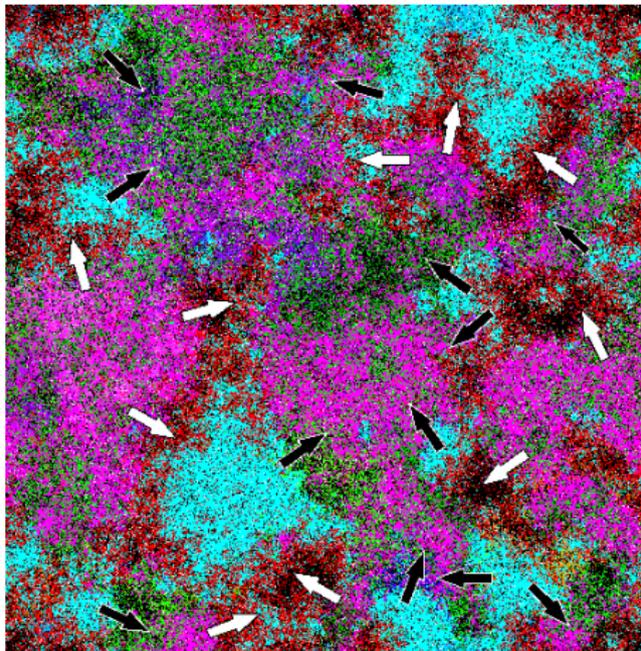

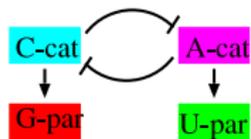

# Evolution of Sequences, Structures & Interactions

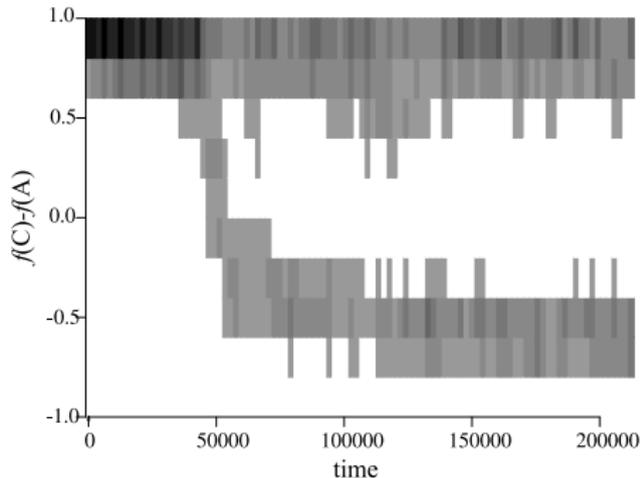

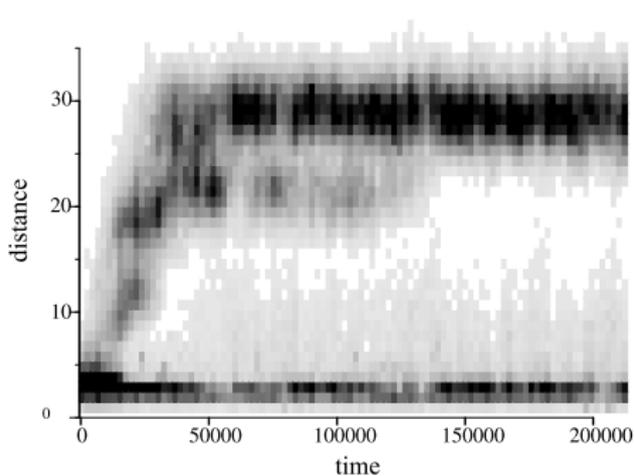

$$\mu = 0.004$$

# Evolution of Ecosystem

# Speciation

- Chain reactions of niche generation & speciation
